-y @modelcontextprotocol/server-github

> Advanced options

create a repo named "automation\_check" in my git syedshara

Create repository

Perfect! I've successfully created a new repository named **automation\_check** in your GitHub account. Here are the details:

### Repository Details:

- **Name:** automation\_check
- **Full Name:** Syedshara/automation\_check
- **Status:** Public
- **Created:** October 19, 2025
- **Default Branch:** main
- **Repository URL:** [https://github.com/Syedshara/automation\\_check](https://github.com/Syedshara/automation_check)

The repository has been initialized with a README.md file. You can now start adding files and pushing code to it. Would you like me to help you add files or make any changes to this repository?
